

Dillon Hardwick graduated from Monarch High School spending much of his time as a MoHi 360 leader, and member of Science Honor Society and DECA. He has had a passion for helping the community through frequently assisting neighbors in various ways since middle school. He has worked at the family owned restaurant Mudrocks Tap and Tavern for nearly 3 years, steadily increasing his responsibilities ever since. He was a member of the Monarch DECA business club having placed in the top three in his category at three invitationals in finance and accounting. He found an interest in stock trading this past year by going out of his way to seek one-on-one guidance from his former finance teacher who he's thankful was open to teaching him stock principles and financial analysis. He enjoys going to the rec center to play basketball with friends in his free time. Hardwick will pursue degrees in engineering and finance at CU Boulder in Fall 2020.
